2. Support simultaneous transmission of video and audio;
3. Supports up to 8 wireless screen transmission connections at the same time, which can be achieved by clicking the wireless screen transmission LOGO button

Quickly switch screen content;

4. Supports screen transfer from personal computers to tablet devices/screen transfer boxes in an expanded form;
5. Supports touch passback, allowing manual touch operation of personal computers on tablet devices.

## 4. Simple troubleshooting

When the system cannot connect, please troubleshoot the following issues:

1. Please check whether the wireless screen sharing software is running normally on the computer device;
2. Please check whether the wireless screen sharing is correctly paired with the tablet device;
3. When using it for the first time, if the wireless screen sharing software is plugged into the personal computer, the wireless screen sharing software will not pop up automatically.

To run the program, you can directly open the [This Computer] path, click on the wireless screen transfer software to run the program

(No need to manually start the wireless screen sharing software again);

4. When the hotspot of the tablet device changes, you need to pair it again when using wireless screen sharing again.
